

**MyLinkGuard.com**

**Instantly Increase your affiliate sales by up to 912%  
.....for FREE!**

Welcome!

And thank you for downloading the MyLinkGuard software package. Using our simple system you will be able to instantly create an unlimited amount of pages, each disguised and pointing to one of YOUR affiliate links.

What's more, you'll also be able to make Extra cash with the MyLinkGuard affiliate program, but more on that later...

Using this system, I have been able to increase my click-thrus by some 600% – 900%. Obviously, more click-thrus means more people seeing your site, which means more sales for you!

Think about it, look at these two sample emails...

Hey Richard,

If you want to get tons more traffic to your Site, check out this webpage!

This one is a blatant affiliate link, trying to sell you something. The truth is, people HATE trying to be sold! Have a look at this one though...

This one doesn't look like an affiliate link, it looks like a normal Webpage URL and for that reason, it's much more likely to get clicked if somebody sees it in an email.

In fact, this is something I tried myself and ended up with over an 800% increase in click-thrus. It needed no fancy expensive software, it didn't take weeks of optimising my site.

All I had to do was use the MyLinkGuard system. Just edit two parameters in the template file and upload it to my site, that's it!

Less than 5 minutes work and 800% more sales. Not bad, huh? :-)

Ok, now that you know what it can do for you, lets get on to how you do it...

## Making Your Disguised Pages.

First of all, you must make sure you've got the program from our website, so download the following file

<http://www.succeedyourself.com/linkguard/linkguard.exe>

Open up the program.

First it will ask you for your Paypal email (to receive commissions)

Secondly it will ask for the URL you want to cloak.

Third, hit the 'Save to HTML' button and save it (I usually save it as "index") on your Desktop or somewhere that you'll remember.

That's it, your page is now protected!

Now that the file is ready, you need to upload it to your site.

If you already have a site, upload it to whatever folder you wish. You can also make a new folder called 'recommends' and place the index.html file in it. Direct people to <http://www.yoursite.com/recommends> and the file will automatically be loaded and your affiliate link will be cloaked.

If you don't have your own site, you can get one for free from many places online. Ones that I have used in the past are

<http://www.atspace.com>

<http://www.host-no-cost.com>

And there are plenty more if you type in 'Free webhosts' in google.

With atspace.com, you choose your username and your URL will be as follows <http://username.atspace.com> which is still a lot better than any affiliate link. Particularly if you choose your name, you can get a personal looking site that is much more 'clickable' and friendly e.g <http://RichardLegg.Atspace.com>

### Multiple pages

Using this system, you can generate an unlimited number of protected affiliate pages. You can save each file as a different name e.g traffic.html, special.html, offer.html

Alternatively, you can create multiple folders and put an 'index.html' file in each folder. All you need to do then is have <http://yourdomain.com/folder> as the URL to promote.

### Making Extra Cash

Remember the EMAIL you changed in the file before? This is because when you download the software, you become an instant affiliate to the program so you can make extra money, just by showing your site.

“How can I make money with a free site?” I hear you ask!

Good question, but here’s the answer...

When someone visits your new protected page, it will also load up your MyLinkGuard affiliate page automatically in the background. When they leave or close your original site, your MyLinkGuard affiliate page will be shown to them.

When they submit their info to download the software, they will be shown a one time offer page with a huge package of resale rights software for \$97.

We’ve worked out that more than 1 in 10 will take advantage of the offer, and when they do, you’ll instantly earn \$48.50 directly into your paypal account – that’s 50% of every sale you generate deposited instantly into your account

Since the MyLinkGuard software is Free, we’ve found that as many as 8 out of 10 visitors will sign-up. So get as many people as you can to visit your pages.

That means a lot more people will see your ‘One Time Offer’ page, and will mean a lot of extra cash into your account, just for promoting your normal sites!
